SUMMARY

Enthusiastic Data Science undergraduate with knowledge of data analysis, statistical techniques, and business intelligence tools. Experienced in academic projects involving data cleaning, visualization, and dashboard development using Python, SQL, and Power BI. Seeking a Data Analyst Internship to contribute analytical skills while gaining industry experience.

EDUCATION

BSc (Hons) in IT Specializing in Data Science Undergraduate	Sept 2023- Present
- Sri Lanka Institute of Information Technology (SLIIT Malabe, Sri Lanka) current GPA : 3.32/ 4.0	
AI /ML Engineer Course - first & second stage	2025
SLIIT (Malabe, Sri Lanka)	
Python for beginners-Centre for Open & Distance Learning	2025
University Of Moratuwa	
G.C.E. A/L	
- Rahula College Matara - Physical science stream	2021- 2022

WORK EXPERIENCE

- Internship Trainee**
- People's Bank - Morawaka | May 2023 - Nov 2023**
 - Assisted customers with banking services and handled day-to-day banking operations.
 - Supported account management, document verification, and data entry tasks while maintaining accuracy.
 - Gained practical experience in customer service, financial record management, and banking procedures.
- SPAR supermarket Floor Helper -part time**
- SPAR SL pvt (Ltd)| 2023- present**
 - Assisted customers with product inquiries and provided support to ensure a positive shopping experience.
 - Helped with stocking shelves, organizing merchandise, and maintaining store cleanliness and presentation.
 - Supported daily store operations while developing teamwork, communication, and customer service skills.

PROJECTS

AI-Powered Movie Recommendation System | [LINK](#)

Tec Stack :MERN Stack (MongoDB, Express.js, React.js, Node.js), Python (Flask, Pandas, Scikit-learn), TMDB API, JWT Authentication.

- Developed a full-stack AI-powered movie recommendation platform using the MERN stack with a **Python/Flask microservice architecture**.
- Integrated **TMDB API** to fetch and display real time movie information, ratings, and metadata.
- Implemented secure user authentication and authorization using **JWT-based authentication**.
- Built a content based recommendation engine using Pandas and Scikit-learn cosine similarity to generate personalized movie recommendations.
- Designed and optimized data processing workflows for movie metadata analysis and recommendation generation.
- Developed responsive user interfaces for movie discovery, search, and recommendation visualization.

Car Sales Dashboard - Power BI Solution | [LINK](#)

Tech Stack: Power BI , Excel ,DAX ,Power Query , Data Modeling

- Produced an interactive Power BI dashboard to analyze car sales trends, average pricing, cars sold, and regional distribution. Utilized Power Query, DAX, and data modeling techniques to clean, transform, and visualize sales data. Presented key sales insights through interactive visuals to support faster and clearer business decision-making

SuperStore Retail – Data Warehousing & BI Project

Technologies: SQL Server 2022 · SSIS · SSAS · Power BI · T-SQL ,DAX, OLAP

- Designed and implemented a dimensional data warehouse for the SuperStore retail dataset using star schema modeling, including fact and dimension tables with support for hierarchies and Slowly Changing Dimensions (SCD).
- Developed end-to-end ETL pipelines using SSIS and built OLAP cubes in SSAS to enable interactive business intelligence reporting in Power BI and Excel, supporting sales and customer analytics through advanced visualizations and drill-down analysis.
- Deployed an SSAS Multidimensional Cube with a 4-level Calendar hierarchy and built 4 Power BI reports analysing in procurement spend with drill-through and cascading slicers

Eventrix - Equipment Rental System [LINK](#)

Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js)

- A job-finding pEngineered a full-stack web application for renting event equipment using MongoDB, Express.js, React, and Node.js.
- Implemented comprehensive CRUD capabilities to ensure seamless inventory management and data handling.

NEXUS Uni Hub - Authentication and Authorization Module [LINK](#)

Tech Stack: Spring Boot, Spring Security, JWT, OAuth 2.0, React, MongoDB, Gmail SMTPa, Servlets, MySQL

- Implemented secure authentication and authorization using Spring Security with JWT, Google OAuth 2.0, GitHub OAuth, role-based access control (USER, ADMIN, TECHNICIAN), and app-based Two-Factor Authentication (TOTP).
- Developed a secure user management and notification system featuring dual-token JWT authentication with HttpOnly cookies, automated Gmail SMTP email services for account recovery, and event-driven notifications for booking, ticket, and user activity updates.

SKILLS SUMMARY

- **Languages** : Java , Python , Html , CSS , Kotlin ,R , SQL ,C/C++ , JavaScript (inferred from MERN)
- **Data Analysis & BI:** Data Cleaning, EDA, Statistical Analysis, Data Visualization, Predictive Modelling, Power BI, Excel, DAX
- **Frameworks & Libraries** : TensorFlow, Scikit-learn, OpenCV, PyTesseract, MERN Stack, Tailwind CSS
- **Tools & Technologies** : Power BI ,Android Studio, Mongo DB , Eclipse , VS Code , RStudio , Postman , Word ,Excel , Figma,git ,TensorFlow , Pytorch , Keras
- **AI/ML & LLM Tools** : ELT /ETL, Data Cleaning,Prompt Engineering, FastAPI, LLMs ,Gemini API, OpenAI API,NLP (summarization, classification, text processing) , Deep Learning (TensorFlow, ANN/CNN basics),Model training , Validation , Feature extraction
- **Cloud** : AWS & Azure (hands-on labs via Skill Builder and Microsoft Learn)
- **Soft Skills** : Time Management,Teamwork & Collaboration ,Time Management Adaptability , Problem Solving & Critical Thinking
